SUMMARY

Full-Stack Software Developer and Mobile Developer with strong experience building scalable web and mobile applications using modern technologies including React, TypeScript, Flutter, Python, Firebase, and Supabase. Passionate about clean code, system design, and building real-world solutions that improve user experience and solve practical problems.

Experienced in end-to-end development, including frontend interfaces, backend APIs, database design, authentication systems, and AI integration using Vertex AI. Demonstrated ability to work independently and collaboratively through multiple full-stack projects, including a mental health platform with AI integration.

Seeking opportunities in Full-Stack Development, Mobile Development, Game Development, and Cybersecurity to further expand technical expertise and contribute to impactful software systems.

EDUCATION

KCA University, Nairobi, Kenya

Bachelor of Science in Software Development

2024 – 2028 (Ongoing)

Moringa School

Software Development Certificate

Feb 2024 – Aug 2024 (6 months)

EXPERIENCE

Assistant Developer (Volunteer)

Nov 2025 – May 2026

Trelio Mental Health Platform

- Contributed across the full-stack development lifecycle in a two-person development team
- Assisted in building and maintaining a cross-platform mental health application using Flutter and Firebase
- Participated in frontend UI development, backend integration, and feature implementation
- Supported integration of AI-powered wellness assistant using Vertex AI (Gemini models)
- Worked on authentication systems, real-time messaging, and data management
- Contributed to debugging, testing, and improving application performance and stability

PROJECTS

Trelio – Mental Health Support Platform | A cross-platform mental health application providing peer support, therapist access, and AI-powered emotional assistance.

- Flutter, Firebase, Vertex AI, RevenueCat
- Peer-to-peer encrypted messaging system
- AI wellness companion powered by Vertex AI
- Therapist directory and booking system
- Mood tracking and analytics dashboard
- Crisis detection and escalation system
- Subscription management via RevenueCat
- Cross-platform support (Android, iOS, Web)

HomeCare Hub – Service Booking Platform | A professional service booking platform for pest control and cleaning services.

- React, TypeScript, Supabase, EmailJS
- Service listing and booking system

- Admin dashboard for managing bookings
- Email notifications and contact system
- Responsive UI with Tailwind CSS

CRM Web Application | A customer relationship management system for managing client interactions and business workflows.

- React, TypeScript, Vite
- Responsive dashboard interface
- Type-safe architecture using TypeScript
- Scalable frontend structure

FreelanceFusion – Freelance Marketplace | A platform connecting freelancers and clients with job posting and management features.

- React, Python, REST APIs
- Client and freelancer interaction system
- Backend API development in Python
- Modern React frontend UI

EstateEmpire – Real Estate Platform | A property listing and management system with dynamic filtering and search functionality.

- React, Python Backend
- Property listing system
- Backend integration for data management
- Search and filtering features

TECHNICAL SKILLS

React 18

TypeScript

Vite

Tailwind CSS

React Router

Context API

Redux

Flutter 3.19+

Dart

Provider State Management

Cross-platform app development (Android, iOS, Web)

Python (Flask, Django)

Node.js (Express.js)

REST API Development

Firebase Cloud Functions

PostgreSQL

Firebase Firestore

Supabase (PostgreSQL + Auth)

Firebase (Auth, Storage, Analytics, Crashlytics)

Google Cloud & Vertex AI (Gemini AI integration)

Supabase

Git & GitHub

EmailJS

RevenueCat

Full-stack development (Frontend + Backend + Database)

Mobile app development using Flutter
AI integration using Vertex AI (Gemini models)
API design and system architecture
Authentication systems (Firebase Auth, Supabase Auth)
Cross-platform application development
Clean code and scalable architecture design

LANGUAGES

English – Fluent Kiswahili – Fluent

ACHIEVEMENTS

Built and deployed multiple full-stack production-ready applications Developed Trelia, a cross-platform AI-powered mental health platform Gained hands-on experience in real-world system architecture and AI integration Built 90+ GitHub repositories demonstrating consistent development growth

CAREER OBJECTIVE

To grow as a Full-Stack and Mobile Developer with a long-term goal of specializing in Game Development, Cybersecurity, and advanced scalable system architecture while contributing to impactful software solutions globally.
